

What is Optometry?

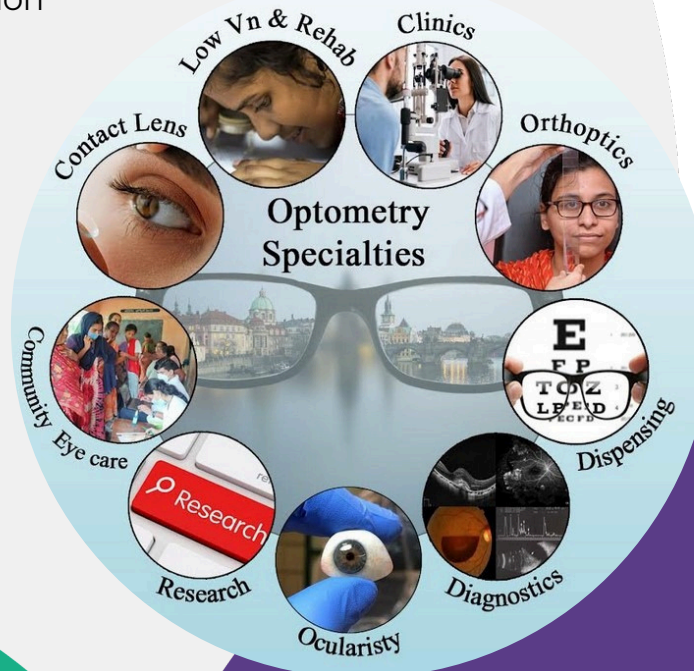

Optometry is a highly skilled and in-demand healthcare profession focused on the examination, diagnosis, and management of visual and ocular conditions. It plays a vital role in primary eye care, including the correction of refractive errors, early detection of eye diseases, and vision rehabilitation, thereby contributing significantly to the prevention of vision impairment and the enhancement of overall quality of life.

Eye screening camps

Our students are trained enough and take responsibility of treating eye conditions in nearby villages by conducting camps at local level
